

NON-LETHAL WEAPONS

NON - LETHAL WEAPONS

PLASMA-SONIC-HPM-RF

Abstract

In 1997 was published, that victims of - Microwave Hearing System dont have microchips in the head. That was 40 years military international TOP SECRET. Today explore microwave radiation on humans UK,France,America and Russia.It are criminal groups recruited over World, for testing peoples. These criminal groups are recruit like »operators« for talk by pc-computers to victims and RF signal go direct in the heads (2D Satellite Sound System). It is mind control use on peoples, from NATO and Secret services FBI,CIA,KGB.Today after 2000 is the worst international military crime over World.

EUROPA - TARGETED INDIVIDUALS

The human mind has never been a simple project. Because of its complexity and plasticity, it has yet not been completely understood. Under the dark ages of brain research, scientists have nevertheless learned how to stimulate and partially control the human brain's responses. At any time it has been done, it has caused pain and suffering for the owner of the brain: the human subject. Backed up by the "best" scientists, sponsored by the military and the secret service, thousands of individuals have their lives destroyed in the quest of developing technologies that are not science fiction anymore.

The human brain, is seen as a computer where information can be downloaded and from where information can be uploaded. Cloning the individual's brain and nervous system is the only hope today's scientists have to understand the human brain and develop advanced artificial intelligence and synthetic telepathy, allowing people to communication by thought, not speech. The European and World countries governments, faced with this "challenge" are unable to protect their citizens against the greatest possible violations of their human rights. There are no excuses whatsoever for researchers to destroy people's and entire families lives. Under the secrecy of "national security", they violate human rights conventions and every universal human right a human being is born with, going deep into the very consciousness of the person that is affected.

Many human rights campaigners from around the world have spent years working on countless books, videos, websites, rallies and symposiums which highlight these matters. These include efforts by prominent persons like Dr Nick Begich, Dr Rauni Kilde (ex chief medical officer for Finland) and well known author Gloria Naylor. To date, all of it has been ignored by the criminally owned/controlled media. However, most importantly, there has been open condemnation of these methods by major political entities and I ask you to focus on these...

TECHNOLOGIES IN THE ELECTROMAGNETIC SPECTRUM

NONIONIZING RADIATION

LOW FREQUENCY FIELDS RADIO FREQUENCIES AND MICROWAVES

Extremely Low Frequency	Power lines	Telephones	Video Display
	Hydro lines	Mobile phones	Office Equipment
	Power Generation	Cell phones	Battery power
	Electric appliances	Computer terminals	Small appliances
Very Low Frequency	Induction heating	Telephones	Video Display
	VDUs	Mobile phones	Flourescent lighting
	Underfloor heating	Cell phones	Halogen lamps
	Pagers	Computer terminals	Security Systems
Radio Frequencies	Mobile Radio / CB	Mobile phones	Wireless "toys"
	Broadcast AM FM TV	Cell phones	Wireless Computer
	Radar, Navigation	Computer terminals	Satellite receivers
	Pagers	Video Display	Telephones
Microwaves	Radar, navigation	Mobile phones	Computer terminals
	Microwave ovens	Cell phones	
Infrared	Sunlight		Furnace
	Germicidal lamp		Welding arc
Visible Light			

Scientific research has shown that the higher frequency EM fields interact more strongly with tissue and have more detrimental biological impacts on exposed tissues.

Supercomputers

Designed to test the safety and reliability of the nation's nuclear weapons stockpile without underground nuclear detonations, the Lightning computer system at **Los Alamos National Laboratory** connects, or "clusters," several thousand processors to perform up to 11 trillion operations per second.

Funding and Initial Research:

NIH, DOE, NSF, NIST, ONR- NAVAL research, NASA and DARPA, since the 1950s

MURI: Synthetic Telepathy

Multidisciplinary University research initiative program

RESEARCH

We are conducting basic neuroscientific and signal-processing research on imagined speech production and on intended direction. When thinking to oneself silently, one can often hear imagined words in one's head. We use non-invasive brain-imaging techniques like EEG, MEG and fMRI to learn more about how the brain produces imagined speech when one thinks. We aim to process EEG and MEG signals to determine what words a person is thinking and to whom or what location the message should be sent. The research is conducted by teams at the University of California, Irvine, at Carnegie Mellon University, and at the New York University. The work of seven investigators and their students is supported directly by this project.

This work is supported by one of 34 awards made in 2008 by the Department of Defense (DoD) to academic institutions to perform multi-disciplinary basic research.

Awards are made by one of three DoD research offices:

Army Research Office (ARO) Office of Naval Research (ONR), and the Air Force Office of Scientific Research (AFOSR). The award is part of the the DoD Multi-disciplinary University Research Initiative (MURI) program. The MURI program supports multi-disciplinary basic research in areas of DoD interest that include more than one traditional science and engineering discipline. For such a multidisciplinary research area, bringing together scientists and engineers with different areas of expertise can accelerate basic research progress and the transitioning of research results to application. The MURI program complements other DoD research programs, which support standard single-investigator research at academic institutions, through awards to multi-disciplinary teams that are both larger and longer in duration. The 2008 awards are for a three-year base period with a two-year option which depends upon the availability of appropriations and satisfactory research progress. MURI awards can provide greater sustained support than single-investigator awards for the graduate training of students pursuing advanced work in science and engineering, as well as for associated infrastructure like research equipment. MURI program is highly competitive. ARO, ONR, and AFOSR solicited proposals in 18 topics important to DoD and received a total of 104 proposals for 2008 funding. The 34 proposals selected underwent merit review by panels of experts in the pertinent science and engineering fields. This MURI award is being supervised by ARO, which is part of the Army Research Laboratory. The ARO's mission is to (1) serve as the Army's premier extramural basic research agency in engineering, physical, information and life sciences, and (2) develop and exploit innovative advances to insure the Nation's technological superiority. Basic research proposals from educational institutions, nonprofit organizations, and private industry are competitively selected.

Next Generation Counter to Both Sane and Insane MAD Systems

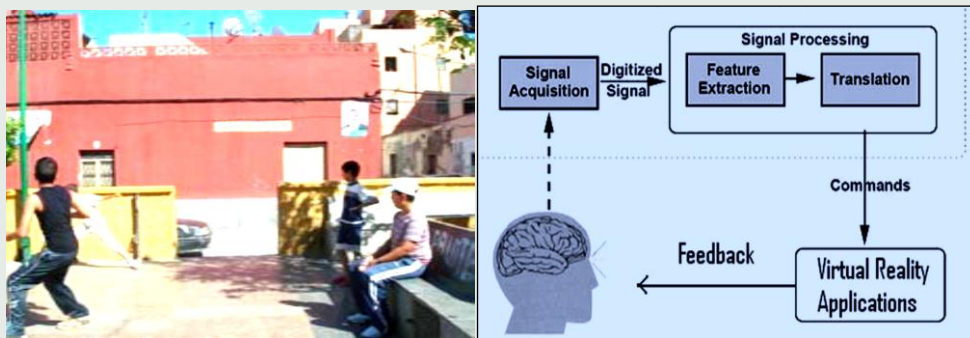

- **Localized quantum potential in an area, used in psychoenergetics mode**
 - **Gradually produces mild, continuous hypnotic state**
 - **Targeted population remains entirely conscious, functional**
 - **Internal "word thoughts" emerge directly in subconscious**
 - **Targeted persons all unaware of these "word thoughts"**
 - **Operates somewhat similar to "post hypnotic suggestion"**
 - **Gradually changes emotions, psychological outlook**
 - **Over a period of time, deviates and entrains entire target population's outlook, belief structure, temperament**
 - **Moves Psywar to inside the human component**
 - **Human minds are the only battleground**
 - **Can be accomplished without overt signature**
 - **Countered only by inserting same methodology into deeper mind level (collective unconscious)**

The Air Force's Corporate Research and Development Laboratory

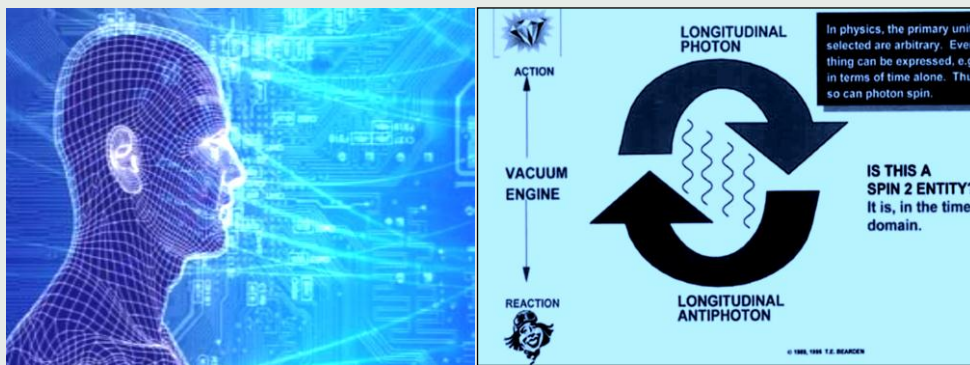

Computational Models of Human Behavior:

A fundamental under-standing and predictive capability of human behavior dynamics.

Cognitive Neuroscience:

More deeply understand and more fully exploit the fundamental mechanisms of the brain.

Plasmas and High Energy Density

Objective: Pursue understanding of fundamental plasma, non-linear electromagnetic phenomena, and the non-linear response of materials to high electric and magnetic fields.

• **Critical Subjects Include:**

- Space weather
- Plasma discharges & non-equilibrium chemistry/thermo
- Plasma control of boundary layers in turbulent flow
- RF propagation and RF-plasma interaction
- High power beam-driven microwave devices

• **Tech Horizons KTAs:**

- Advanced RF Apertures
- Directed Energy Effects
- Radiation Hardened Electronics
- High Power Microwaves -HPM
- Orbital Environment Characterization

RF - Plasma – Microwaves

Speed of the weapon

The speed of the energy weapon is determined by the density of the beam. If it is very dense then it is very powerful, but a particle beam moves much slower than the speed of light. Its speed is determined by mass, power, density, or particle/energy density.

After arrest in 1937 his traces are lost, but probably, he has continued the researches already included laboratory NKVD, that it is possible to assume that in 30-years practice of retaliatory bodies included tortures with use VZ - radiations in combinations with drugs. Since 30th years the psychotronic. weapon three totalitarian countries - Germany, Japan and USSR are engaged in development is.

The greatest successes in this area are reached with Germany, after route CQ, the basic documents on this weapon get in the USSR, except for that after war to the USSR German chemists who since 1945 for 1954 were engaged in the USSR in development of psychotropic substances and drugs for the psychophysical weapon were brought, and the USSR became conducting country on psychotronic. The scientific has offered us many specific ways for management of behaviour, ideas and feelings of the person.

It techogenic methods which use: lower rapid irritation, an infrasound, ultrasound, superhigh-frequency radiation (MICROWAVE), torsionic radiation, shock waves.

Even small intensity of the similar concentrated fluctuations considerably influences cogitative structures and nervous system, causing a headache, dizziness, frustration of sight, breath, a convulsion, and sometimes and switching-off of consciousness.

Piercing of the elected sites of a brain by well focused ultrasound is applied to irretrievable withdrawal from memory of any memoirs. The ultrasound is used for suppression of will, oppression of immune system, deterioration of state of health, reduction of the person a passive condition. Pulses of ultrasonic radiation it is possible to stop heart of any person. Thus the death for associates will look natural, at opening a corpse of a violent death it is not found out.

Superhigh-frequency radiation (MICROWAVE) - this electromagnetic radiation which influencing on the biocurrents having frequency from 1- 35 Gz causes infringement of perception of a reality, rise and descend of a tone, weariness, a nausea, a headache, full sterilization of instinctive sphere, damage of heart, a brain and the central nervous system.

Waves actively modulated in frequencies of an alpha - rhythm of a brain, are capable to cause irreversible "kinks" in behaviour- schizophrenia.

The MICROWAVES of radiation modulated by speech, introduce the information directly in a brain, therefore people hear voices of operators which work with them, thus anyone psycho working up subconscious is accelerated.

As aerials for transmitters of such waves telephone and radiorelay postings, pipes of the water drain and heating, the TV, the phone, the fire-prevention signal system are used! Under influence of the MICROWAVE of radiation there is a weariness, a nausea, a headache, heart, a brain, the central nervous system can be damaged. Their radiation directed the MICROWAVE causes spasms of legs, pains in ears, burning in soles of legs, pezú in eyes, clicks in "hum" to a head, at impacts in a nasopharynx causes cough, sneeze, a cold, aritmia hearts, dumb hands.
